Have You Had a Green Moment?

Life is comprised of many moments, like morning coffee, drive to work, lunch, shopping, etc. What would happen if you picked one moment every day to be "green"?

For example, compost your coffee grounds, pack your lunch in a reusable container or use reusable shopping bags. Little actions (i.e. moments of green living, small pollution prevention measures) can grow quickly into something much bigger. Create a green moment in your life today.

A great place to start is by visiting DCA's "Green Moments" at <http://dca.ky.gov/kyexcel/Documents/GreenMomentsCalendar2016-2017.pdf>.

DCA's "Green Moments" is a monthly electronic resource comprised of environmental education hyperlinks and pollution prevention tips with a fun twist. Everyone has room for a "Green Moment," especially when it is fun.

Volume 4, October 2016

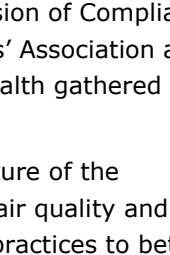

New Members

Please join us in welcoming our newest members:

- Carter County Soil Conservation District, Advocate
- Cumberland Valley RC&D Council Inc., Advocate
- US Green Building Council Kentucky, Advocate
- Safe Harbor Academy, Advocate
- Klausling Group, Advocate
- Shaker Village of Pleasant Hill, Partner
- Smithfield Packaging – Grayson Plant, Upgrade from Partner to Leader

Training Opportunities

For current training events please visit the following:

Sixth Annual Sustainable Spirits Summit

The Sustainable Spirits Summit is a yearly event that brings leaders from distilleries, breweries, state government agencies and trade associations together to discuss mutual industry concerns and suggestions.

This year, Brown-Forman Corporation hosted the Sustainable Spirits Summit at its headquarters in Louisville, on Sept. 20, 2016. Twenty-one representatives from the Division of Compliance Assistance, Kentucky Distillers' Association and distillers from the Commonwealth gathered for the event.

The summit addressed the future of the Sustainable Spirits Initiative, air quality and air emissions, using sustainable practices to better the environment and your brand, and introduced "The True Cost of Water Spreadsheet," created by

Beverage Industry Environmental Roundtable (BIER). After lunch, which was graciously provided by Brown-Forman, participants were taken on a tour of the building's renovations and outdoor features.

If you would like to learn more about these summits, please see <http://dca.ky.gov/LGGS/pages/sustainable-spirits.aspx>.
